COMMENTS FROM THE OFFICE OF THE TOWN MANAGER

As taxpayers receive their bills for this year the thought not only of the considerable increase this year but of what the future has in store is going through most people's minds.

We know we are faced with increased costs in most departments.

There is almost a certainty of more

money being needed for schools, welfare and insurance accounts.

If a local ambulance service is supplied we will have to anticipate a considerable expenditure there.

There is a need of more men to cover Police protection if we answer the calls we receive.

It is very possible we will lose the personnel we

now have if we do not supply more

assistance to them.

Next year we should be able to de-

crease the appropriation for snow-

removal. This could amount to \$200

per thousand on the tax rate.

Welfare costs are increasing rapidly due to less strict requirements for eligibility to receive assistance.

There appears to be no limit to ex-

penditures for an established welfare

case whereas the taxpayer has to ra-

tion himself to pay the bill.

continued from Page One

er rather than as an indicator of whether on a particular stretch of road where visibility is obstructed, it is safe or unsafe for one vehicle to overtake and pass another vehicle.

Justice Wernick said that the ruling was made in respect to a particular stretch of road in Brunswick which fill the requirements that a highway may be considered as divided into two roadways not only when there is a physical barrier, but also when an intervening space has been left with markings by public authority making it definitely clear that no vehicle shall be driven over, across or within any such dividing space except at a crossover or intersection established by public authority.

Dr. Marvin urged motorists to continue to use the utmost care in approaching school buses whether moving or stopped. He pointed out that there are approximately 1,500 buses on the road daily, many making multiple trips morning and afternoon. "The safety of these vehicles depends on the vigilance of every driver in the state," he said.

TELSTAR R. H. S. NEWS GREENWOOD CITY

GUIDANCE DEPARTMENT

The Guidance Department extends a warm welcome to you all for 1969-70.

The year 1969-70 offers to you all "A New Beginning", an opportunity to eradicate the academic errors of the past year to plan anew your program for 1969-70. It is the time of year when you need to review and re-evaluate your educational assets.

Educational planning is an important part of preparing for your future career after high school or college. The planning involves the united efforts of parents, teachers, counselors and students.

What are the steps involved in educational planning? Any systematic approach to this problem may involve the following steps:

1. Educational planning can be done effectively only by pupils who have developed reasonably well-defined goals for their lives.

2. The goals will have to do with the occupational field one wishes to enter and with the kind of person and citizen he wants to be.

3. Educational planning should be realistic with reference to one's attitudes, other hereditary traits, and environmental opportunities.

4. Interest and abilities developed in certain school subjects are often clues to a wise occupational choice.

5. Educational planning should take into consideration not only courses but also opportunities for the following: (a) extracurricular activities; (b) work experience; (c) other out-of-school activities.

6. All students should plan to finish high school.

7. Many kinds of educational courses beyond high school are available to all people whether they plan to go to regular college courses or to occupational training schools.

8. In selecting your program for this year, consult your parents, administration, teachers and counselors.

9. Success in your placement after graduation, whether it be in college, or in the world at work, will depend upon the degree of achievement made at Telstar Regional during 1969-70.

May the faculty and students at Telstar Regional have a happy and profitable year in 1969-70.

P. S. Thanks for the many letters, cards and beautiful flowers. They are a great enjoyment.

The following article has been received from Miss Bethany Andrews, Telstar '69, who spent six weeks during the past summer on the Island of Rhodes, Greece, with the International Youth Academy.

"The 6 weeks I spent in Greece this summer have become a very important part of my education and life. No one can FEEL the way a man lives and works in Greece by reading a textbook. He must be able to talk, eat, relax, and work with this man to know what he thinks, likes, and dislikes.

"After our group had discussed the Greek culture, customs, economy, and people for a couple of weeks in class, we broke into small groups to visit 4 of the nearby villages. Each group took the bus to its assignment early in the morning. When we got there (our village was Kremasti) we walked around for a while to see just how the people lived, what jobs there were, and how they enjoy their period of relaxation.

"As we walked down the main street we passed a candy shop where a man and his wife were mixing a type of fondu on a cold marble slab. He invited us into his shop and offered

Mrs. Celina Morgan, Corres.

Wouldn't tourists delight in seeing it! But few know of its existence, Rock Dundee; wonder how it got its name.

Several of us recently made a visit there. We walked a short distance through the woods then right before us, this enormous mass rose gray and dignified, a tremendous overhang of granite. We stared up at this barren barrier against the sky and exclaimed. Here was certainly a promise of mystery and fascination.

The foreground deeply and richly forested had given us no hint of the towering mass now facing us.

Underneath the huge crag projection which formed a natural shelter, boulders and rocks in ages past had lost their footing from above and lay here weatherbeaten from the play of elements, presenting a lifeless forbidding front to us. The granite fragments might discourage one to climb, nevertheless we did as we were determined to reach the top.

We used common sense precaution and followed a "path" to the right and up to the top.

Here we encountered blow-downs but otherwise not too bad traveling.

Nearing the edge there was a planetary feeling as if atop the world.

The quietness and solitude were complements to the scene. Far below the lower slopes were of various colors of green; and the road a dark path among the spruces.

Opposite guard stood Telstar Relay Tower reaching up to the sky. Through our binoculars the top resembled a perfect sleigh seat just waiting for one bold enough to mount and ride.

In the far distance the green of the farmlands and the blue of a lake were clearly visible. In fact here was a feast for all senses and we appreciated the glorious beauties nature was unfolding; even the few moments when the sky deepened and we watched the mists gather. Then drops of rain rustled through the trees. But as swiftly as the drops came, the darkness passed; it cleared and everything smiled in the sunshine.

We spoke of the glacier carved valley and noted despite the intensity of the weathering this barren summit showed how it was scratched, etched, rounded and smoothed.

Our caution kept us from venturing too near the edge. We had no desire to go plummeting down this precipice. Surely there would be an extraordinary view of things below but much too brief and would end much too abruptly.

Following a stone wall (there was one even here) we found a gap and started to descend each watching beneath his feet. What is more startling than to have a rock give way without warning beneath your feet or to feel the horrifying suspense when you depend on a tree for support and it decides to fall with you!

Again down and looking once more toward the immensity of Dundee, I feel like a small speck of dust and found that nature here too was too big to understand.

Doris Hayes and Colista Morgan met with other teachers at Agnes Gray's camp for a picnic supper on Thursday.

Mrs. Dale Mills and children spent the week end here at the cottage of Mr. and Mrs. Franzine Mills.

week to the Rangeley region.
